THE NORDIC SUMMER TABLESETTING

It's often when you make it easy for yourself that the table setting becomes cozy for you to do and also makes the finished result something beautiful. When I say make it easy for yourself, I mean that you should use what you have in your home - it is not necessary to invest in a lot of new things to create the right environment. Use an old door or what you have, along with a few table legs. Do you have a garden, then move the table around and

explore the garden's various corners. There will surely be something you have not noticed before, or something that is different than normal. Use what you have of green in the garden as table decoration. Make the table settings with flowers, green leaves or both. Here I have used the leaves from my strawberry plants. I'm very pleased with the shape of the leaves, and it does not have to be much before it is decorative. When setting the table, mix the old with new design and keep it simple, as it probably will be more messy during the evening.
