The summer is here and for some that means holiday and travelling to foreign cities or countries. But some of us stay at home and enjoy the summer holiday in the garden with family and friends, good food, games and relaxing. That is what we are doing this year.

When having that much time at home, I enjoy making something special out of outdoor dinners and table settings. It is especially being outside in my garden for the whole day that makes my holiday unforgettable and which inspires me to bring nature to the table and inside the house.

In this article I invite you to a celebration of summer in my garden, and I hope it will inspire you to slow down, keep it simple, move everyday living outside and relax with your loved ones in the summer of 2015.

I wish you a very wonderful summer by reminding you to enjoy the summer and recharge in the garden and nature.

Use #etmagdeco to demonstrate how you set your summer table. As always, it is about inspiring each other and bringing something personal to the table as well as in the home - and we would love to see your summertable.
